Aircraft Water Servicing Unit on Standard Commercial Chassis

Water servicing vehicles with bespoke tank capacities to suit customer specific requirements.

- Tank capacities can be supplied to suit customers requirements.
- Easily installed on standard commercial vehicle 7.5 – 12 tonne GVW chassis cab, dependent on selected tank size.
- Fresh water delivery system including re-settable flow meter, pressure gauge, flexible delivery hose and ¾ inch Roylyn aircraft connector.
- A correctly balanced vehicle to prevent detrimental stresses and strains on chassis or tanks.
- Hygiene quality, corrosion resistant, stainless steel tank and fittings with longitudinal and transverse baffles mounted on high capacity shock absorbing flexible chassis mounts.
- Optional rear lifting platform for wide body operations.
- Large 600mm access manholes for ease of cleaning and maintenance.
- Easily visible tank contents gauges.
- PTO/hydraulic powered, close coupled, high capacity pumps for efficient aircraft servicing.
- A hygienic vehicle which will reliably perform at all locations throughout the world irrespective of temperature or conditions.
- Finish painted to customers individual livery requirements with full wax treatment.
- Extreme temperature cold weather kit available as customer selected option incorporating insulated tanks and components with thermostatically controlled independently fired heaters.

“ Designed and manufactured to deliver hygienic portable water to aircraft safely and efficiently ”

▶ Water Servicing Unit

Chassis

- Can be fitted to any suitable commercial chassis
- Chassis used to date include:
 - MAN
 - Mercedes Benz
 - Isuzu
 - Iveco
 - Mitsubishi
 - DAF

Tank unit

- 4mm thick hygiene quality stainless steel water tank
- 600mm access manholes
- Foldable stainless steel baffles for ease of inspection and cleaning
- Clearly positioned easy to read contents gauges

Optional equipment

- Cold weather cladding and tank heaters
- Hydraulically operated stainless steel lift platform utilising highly stable double scissor mechanism (max ht 3m)
- Water purification tank and automatic dispensing system
